

Case

TinyMobileRobots

Assignment

COMPANY PRODUCT: GPS guided robots used to mark sports pitches, land surveying, road premarking, etc.

THE COLLABORATION: Development of structural design in cooperation with client. Production of prototypes for use in testing and subsequent continuous production.

PRODUCTION: Aluminium chassis and electronics cabinet

Solution

- ☐ Welding fixtures
- ☐ Pipe bending
- ☐ CNC tooling
- ☐ Sheet metalworking
- ☐ Welding
- ☐ Powder coating
- ☐ Framework agreement

Result

- ☐ High quality finish
- ☐ Uniform elements
- ☐ Optimal production
- ☐ Short delivery time

ab Aluminium supplied very good products and it is crucial that we get high quality products. We are very satisfied with their deliveries. It's a pleasure to work with a supplier who actually specialises in working with aluminium.

Jens Peder Kristensen – CEO, TinyMobileRobots
