

TurnTime Technologies

Assignment

COMPANY PRODUCT: Preparation of complex components for cargo handling systems in freight and passenger aircraft. The customer is the world's leading supplier of integrated cargo systems in aircraft.

THE COLLABORATION: Longstanding collaboration based on a common understanding of high standards of quality, material strength and precision. The products are delivered with proven traceability and fulfil the customer's specific requirements and controls.

PRODUCTION: Production of sub-assemblies in sheet components, machined parts, rolled special profiles and welding of special fixtures. Surface treatment and sub-assemblies are standard for the majority of the products.

Solution

- Fixture solutions
- Special profiles
- CNC machining
- Sheet and plate work
- TIG welding
- Anodising
- Assembly

Result

- High welding quality
- Full traceability
- Documentation
- Uniform products

For many years, ab Aluminium has been a capable and competent supplier of a wide range of aluminium components. They fully live up to our requirements and expectations for suppliers and deliver a stable high level of quality at the agreed time.
